Finding an Indian or South Asian Egg Donor

Your 2027 guide to heritage-matched donors, guaranteed embryos and costs

IndianEggDonors has helped South Asian families since 2006 and has more than 1,400 screened Indian, Pakistani, Bangladeshi and mixed South Asian donors. Many families want a child who shares their heritage, features and family background — and donors of South Asian descent are hard to find through general agencies.

Why heritage matching matters

- Children often look like their parents, and families value a shared culture and language.
- Some genetic conditions, such as thalassemia, are more common in certain South Asian populations, so targeted carrier screening matters.
- You can review each donor's background, education and family medical history before you choose.

The Guaranteed Embryo Program

Instead of paying for a donor cycle and hoping it produces good embryos, you receive genetically tested, Day-5 blastocyst embryos created from standard donors at a fixed rate of **$15,000 per embryo**. Each package includes mature, pre-screened donor eggs and ICSI fertilization.

	Donor cycle	Guaranteed Embryos
Eggs	Frozen eggs (12): $42,000	$36,000
Embryology, PGT and freezing	$30,000	$9,000
Result	No guarantee	3 guaranteed Day-5 embryos
Total	$72,000+	$45,000 (save $27,000)

Frozen donor embryos

Ready-made frozen donor embryo cohorts are also available, with costs that depend on the donor's background and education. Ask our team for current availability and the price of a specific cohort.

How it works

1. Book a free consultation and tell us what you are looking for.
2. Browse matching donor profiles (updated daily).
3. Choose a donor or a guaranteed-embryo package.

4. Embryos are created, tested and frozen, then shipped to your clinic.
5. Your clinic schedules your transfer.

Next steps. Browse available Indian and South Asian donors, then book a free 30-minute Zoom consultation: calendly.com/dga-appointment or call (212) 661-7673.

Prices are those published on IndianEggDonors.com (Guaranteed Low-Cost Embryo Program page) as of November 2026 and are planning estimates, not a quote or invoice. Pricing may change without notice; your final cost depends on your clinic, donor or surrogate, state, insurance and medical needs. This guide is for general education and is not medical, legal or financial advice.
